Mike Pennington to Melanie Burdick call notes4-11-18 4:30 pm
Recorded by Melanie Burdick- EPA

Mike responded to my request for the status MDEQ's review of Aquila's wetland water budgets. Mike: they overestimated runoff on the site given the sandy soils and forested state of the site. Therefore, he believes the indirect impacts from changes in the water budget will be greater than was originally proposed. Aquila will be addressing the runoff issue, but the groundwater input into the budget is based on their current modflow model, which is also flawed.

For an accurate water budget, the company must both fix the runoff metric and the modflow model.

Mike will email me Aquila's recent response tomorrow morning.
